Intermediate Java
Week 6 practice problems

I tested this program with a variety of transactions. I tested the PENALY system, which prevents the user from withdrawing over their balance and charges them. I also tested the free transactions system by creating accounts that expended all five free transactions. I also tested accounts with under five transactions.

```
PROBLEMS  5    OUTPUT    DEBUG CONSOLE    TERMINAL    PORTS

[remllez@archtop intermediate]$ ./run.sh week6 BankAccountTester

Test case 1
The balence is: 1504.90
Expected: 1504.90
This account has 2 transactions, and $0.00 in transaction fees.
Test case 2
The balence is: 5.05
Expected: 5.05
This account has 6 transactions, and $1.00 in transaction fees.

Test case 3
The balence is: 707.00
Expected: 707.00
This account has 10 transactions, and $5.00 in transaction fees.
[remllez@archtop intermediate]$
```
